Introduction and the Importance of Data

Introduction

This school performance profile pack has been produced to help Headteachers, staff and Governors review the performance of their school in end of key stage tests.

On the next page there are a set of questions to use when considering the reports. They provide an analysis of the school's results relative to national data and trends over recent years. They also provide comparisons with the LA itself, Families of Similar Schools and Schools in your District.

The Significance of Data

The use of performance data in schools has increased both in volume and importance over recent years.

The purpose of any reports like these that provide information about pupil performance is not to provide definitive answers but to raise questions, and focus discussion. In some instances, e.g. where pupil numbers are small, the data may not be particularly reliable and should be treated with caution.

Key Stage 2 Kent and National Results 2015
